

The ekey xLine fingerprint scanner

A new era is beginning with the ekey xLine fingerprint scanner because the intelligent use of buildings begins with smart functions right at the front door. Users will experience a new feeling of comfort and enjoy more flexibility in their everyday life.

The door is conveniently opened with the ekey xLine fingerprint scanner via a touch sensor. Thanks to their experience with smartphones, users will already be familiar with how to operate the device, so it is particularly user-friendly. Another advantage: while conventional keys, smartphones, codes or cards can be forgotten, misplaced, or lost, your finger is always on hand. But the ekey xLine fingerprint scanner goes even further and offers a new feeling of comfort with smart features that make everyday life easier. The ekey xLine: an intelligent access control system that – already today – is meeting the wishes of tomorrow.

Now is the time to enter the age of biometric access control systems!

ekey xLine fingerprint scanner

And your smart home starts at the front door!

Smart access with fingerprint scanner! While keys, codes, or cards can be forgotten, misplaced, lost, or stolen, your finger is always on hand. However, the ekey xLine goes even further – it gives the front door a smart upgrade with new features! This creates more convenience and security in everyday life for the whole family.

What's so special about fingerprint scanners?

The latest generation of ekey fingerprint scanners uses state-of-the-art technology with an area sensor. They thus correspond to the current technological status, which is already known from everyday life, such as from smartphones. The biometric access control solutions create more convenience, flexibility, and security in everyday life:

- Keyless access
- Convenient remote opening
- Automatic push notifications
- Virtual assistant Amazon Alexa
- Expandable at any time
- Smart home connectivity
- and much more

Enjoy freedom

No more keys, your finger is always on hand. Open the door, close the door, and go!

Impossible to lock yourself out

Assign individual access authorizations and your finger becomes the key!

Smart functions

Simple app administration for smart functions, so the smart home starts right at the door!

Expandable at any time

All systems can be flexibly expanded to include additional devices, users, and functions.

The ekey bionyx app

The fingerprint scanner system from ekey is conveniently administered with the ekey bionyx app via a smartphone or tablet. This is where the authorizations and different roles for family, friends, and service providers are assigned. The access log shows the activity of the fingerprint scanner over the past seven days.

The ekey bionyx app is also the trigger for smart functions: The door can be opened remotely — a practical everyday helper! With push notifications on the smartphone, users can choose to receive a notification that their loved ones have arrived safely at home. The connection to Alexa, the Amazon virtual assistant, provides additional convenience at the front door.

But ekey offers much more: It is not necessary to decide in advance what scope the access control system should have. Functions and devices can be added at a later date. With the ekey bionyx app, all connected devices, access areas, functions, and users are always in view and can be administered centrally.

Find out more!

All information can be found at www.ekey.net/en/ekey-bionyx-app/ or simply by scanning the QR code.

Still have questions?

You will find practical answers to the most frequently asked questions in the FAQs directly in the app! Would you like to find out more about the activation in advance? Then come visit www.ekey.net/en/bionyx-faq/!

The ekey xLine in everyday life

While conventional keys, smartphones, codes or cards can be forgotten, misplaced, lost, or stolen, your finger is always on hand. The ekey xLine fingerprint scanner builds on the proven convenience of keyless access with numerous smart applications.

Your finger as a key

Simply open the door with your finger — without a key, smartphone, code or card. Be it for running, cycling, inline skating or when the dog wants out: enjoy the freedom to head out as you please.

Remote opening*

With an ekey fingerprint scanner, you can conveniently unlock the door with your smartphone when you are out and about. This means you can open the door for your handyman even if you are still on your way home. Let in your friend at a moment's notice to lend him the pressure washer — even if you are on vacation. Be sure you can let someone into the house if necessary.

* Free from 01/01/2023 to 12/31/2023, subject to a charge from 01/01/2024 (subscription model)

Maximum security

For its products, ekey guarantees the very highest standard of security against misuse and unauthorized access to the access control system.

Only authorized persons can open the door with the ekey fingerprint scanner. The ekey fingerprint scanner is 1,000 times more secure than the 4-digit number code of an ATM card.

Flexibly expandable system

Anyone building or renovating a house is faced with many decisions. Often, not all wishes can be fulfilled immediately. This is not a problem for the ekey system, since functions and devices can be added at a later date. Users can be stored, temporarily disabled or deleted.

Push notifications*

No more uncertainty! You automatically receive a message on your smartphone as soon as the door has been opened with the fingerprint scanner. This is useful in many everyday situations, but especially with children. Thanks to the push notification, you can be sure that your child made it home safely from school.
